
Releasing equity, **step by step**

The order that keeps the next purchase on track.

BEFORE YOU ASK

Get the real number

- ▶ Use the lender's valuation, not the app's.
- ▶ Usable equity is 80% of value, less the loan.
- ▶ Plan on that figure only.

BEFORE YOU ASK

Check capacity

- ▶ Model serviceability first.
- ▶ Debt to income caps the release.
- ▶ The smaller number wins.

WHEN YOU RELEASE

Name the purpose

- ▶ Earmark it for the next deposit.
- ▶ Keep a cash buffer back.
- ▶ No purpose, no release.

WHEN YOU RELEASE

Structure it clean

- ▶ A separate split against the grown property.
- ▶ Interest only, in an offset.
- ▶ Document the purpose from day one.

Order beats urgency.

Get the sequence right and the release is simple.
Skip it and the bank says no. Full edition at
