

Are you **on track** to your goal?

Most investors are guessing. Here's the 5-minute check.

START AND TARGET

Where you are today

- ▶ Your real equity across every property, after debt
- ▶ What the portfolio actually nets you after all costs today
- ▶ The honest position, not the number you carry in your head

START AND TARGET

Where you want to be

- ▶ The income you want the portfolio to replace, in today's dollars
- ▶ The age you want to be free to stop adding to it
- ▶ A specific target you're solving for, not a vague someday

THE GAP THAT MATTERS

The gap itself

- ▶ How much more equity stands between you and the target
- ▶ How many more properties that actually translates to
- ▶ How many years it takes at your current pace

THE GAP THAT MATTERS

Why it rules every decision

- ▶ How much you can safely borrow for the next purchase
- ▶ Whether to chase growth, cashflow, or manufactured equity
- ▶ Whether the smart move now is to buy again or consolidate

You can't close a gap you've never measured.

Comment TRACK and I'll send you our Property Portfolio Gap Analysis. It runs these numbers in about five minutes.
