

High income, **no** **momentum**

Why the bigger salary so often builds the smaller portfolio

01 · DISCIPLINE

Discipline is the real income

- ▶ The gap between earning and spending builds the portfolio, not the salary.
- ▶ The same saving costs the high earner half the share of take-home pay.
- ▶ Most never do it. Lifestyle swallows the surplus first.

02 · KNOWLEDGE

Knowledge is the multiplier

- ▶ Cash in the bank barely moves.
- ▶ Know-how turns a surplus into a leveraged position.
- ▶ The high earner without it never compounds.

03 · FEAR

The fear tax

- ▶ The more you earn, the more you feel you have to protect.
- ▶ Fear shows up as endless research, never a purchase.
- ▶ Waiting is the largest hidden cost in a net worth.

04 · SYSTEM

Momentum is a system, not a mood

- ▶ Buy when the numbers work. Let it grow. Recycle. Repeat.
- ▶ A cadence compounds. A burst of enthusiasm does not.
- ▶ Diligence beats motivation every time.

TAKEAWAY

Earning more is not a strategy

- ▶ Deciding what your money does is.
- ▶ Full numbers in this week's Property Notes.
- ▶ Read it free at pbco.com.au.
